FOR DISTRIBUTION AND USE ONLY WITHIN OREGON

Omite®-6E

AGRICULTURAL MITICIDE

FOR CONIFERS

EPA REG. NO. 400-89 EPA SLN NO. OR-030022

COMPOSITION

Active Ingredients: (% by weight)	
Propargite 2-(p-tert-butylphenoxy) cyclohexyl 2-propynyl sulfite	69.2%*
Inert Ingredients	30.8%
Total:	100.0%

*Contains 6 lbs. active ingredient per gallon.

KEEP OUT OF REACH OF CHILDREN DANGER

Si usted no entiende la etiqueta, busque a alguien para que se la explique a usted en detalle.
(If you do not understand the label, find someone to explain it to you in detail.)

FIRST AID

IF SWALLOWED: Call a physician or Poison Control Center. Drink 1 or 2 glasses of water and induce vomiting by touching back of throat with finger. If person is unconscious, do not give anything by mouth and do not induce vomiting.

IF ON SKIN: Wash with plenty of soap and water. Get medical attention.

IF IN EYES: Hold eyelids open and flush with a steady gentle stream of water for 15 minutes. Get medical attention.

IF INHALED: Remove victim to fresh air. If not breathing, give artificial respiration, preferably mouth to mouth. Get medical attention.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage. Contains petroleum distillates. May pose an aspiration pneumonia hazard. All treatments should be based on observed signs and symptoms of distress in the patient. For medical advice contact Chemtura Emergency Phone 800-292-5898.

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS DANGER

Corrosive. Causes skin burns. May be fatal if swallowed. Causes substantial but temporary eye injury. Harmful if inhaled or absorbed through skin. Prolonged or frequently repeated skin contact may cause allergic reactions in some individuals. Do not get in eyes, or skin or on clothing. Avoid breathing spray mist.

PERSONAL PROTECTIVE EQUIPMENT

Some materials that are chemical-resistant to this product are listed below. If you want more options, follow the instructions for Category F on an EPA chemical resistance category selection chart.

Applicators and Other Handlers Must Wear: Coveralls over long-sleeved shirt & long pants; chemical resistant gloves such as barrier laminate, nitrile, butyl, or viton; chemical-resistant footwear plus socks; protective eyewear; chemical-resistant headgear for overhead exposure; chemical-resistant apron when cleaning equipment, mixing or loading. Applicators, if applying more than 4 pints of OMITE-6E (64 oz.) per acre in air blast equipment must be in an enclosed cab.

Discard clothing and other absorbent materials that have been drenched or heavily contaminated with this product's concentrate. Do not reuse them. Follow manufacturer's instructions for cleaning and maintaining PPE. If no such instructions for washables, use detergent and hot water. Keep and wash PPE separately from other laundry.

When handlers use closed systems, enclosed cabs, or aircraft in a manner that meets the requirements listed in the Worker Protection Standard (WPS) for agricultural pesticides [40 CFR 170.240(d)(4-6)], the handler PPE requirements may be reduced or modified as specified in the WPS. **IMPORTANT:** When reduced PPE is worn because a closed system is being used, handlers must be provided all PPE specified above for "applicators and other handlers" and have such PPE immediately available for use in an emergency, such as a spill or equipment breakdown.

USER SAFETY RECOMMENDATIONS

Users should:

- Wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet.
- Remove clothing immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.
- Remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

THIS LABEL IS IN ADDITION TO THE STANDARD FEDERAL LABEL PRINTED ON THE CONTAINER

(continued on back)

Follow all applicable directions, restrictions, and precautions on the EPA registered label.

This label must be in the possession of the user at the time of the pesticide application.

EPA SLN NO. OR-030022

ENVIRONMENTAL HAZARDS

This pesticide is toxic to fish. Do not apply directly to water, to areas where surface water is present or to intertidal areas below the mean high water mark. Drift or runoff from treated areas may be hazardous to aquatic organisms in neighboring areas. Do not contaminate water when disposing of equipment washwaters.

PHYSICAL OR CHEMICAL HAZARDS

Do not use or store near open flame.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.

AGRICULTURAL USE REQUIREMENTS

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR Part 170. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE), notification to workers and restricted-entry interval. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard.

Do not enter or allow worker entry into treated areas during the restricted entry interval (REI) listed in the chart below.

RESTRICTED ENTRY INTERVAL	
Crops	
Citrus	21 days
Strawberries	3 days
All other labeled crops	7 days

Exception: After the first 48 hours of the REI, workers may enter the treated area to perform hand labor or other tasks involving contact with anything that has been treated, such as plants, soil, or water, without time limit, if they wear the early-entry personal protective equipment listed below.

PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water, is: coveralls over long-sleeved shirt & long pants; chemical-resistant gloves such as barrier laminate, nitrile, butyl, or viton; chemical-resistant footwear plus socks; protective eyewear; chemical-resistant headgear for overhead exposure

Notify workers of the application by warning them orally and by posting warning signs at entrances to treated areas.

OMITE-6E - CONIFERS

For the control of spider mites on evergreen conifers grown for Christmas trees and ornamental uses. This is to include trees grown on plantations, in nurseries, shade houses, and containers. This may include, but is not limited to, Douglas fir, Grand fir, Shasta fir, Noble fir, Scotch pine, Colorado blue spruce, and similar species.

Ground Application: Apply 2 - 3 pints per acre in 20 to 200 gallons of water per acre depending on plant size, equipment used, and infestation levels.

Aerial Application: Apply 2 - 3 pints of OMITE-6E per acre in 10 to 20 gallons of water per acre. Use a minimum of 30 p.s.i. for aerial applications. In order to obtain better coverage, one half the recommended rate of OMITE-6E per acre may be used and, the area being treated can be flown twice at right angles to each other.

Number of Applications per Season: 3

General Information: For optimum results, treat as soon as mite infestation are first apparent. The greatest benefits can be realized when OMITE-6E is applied on low-level mite populations before severe infestations develop and the needles are covered with webbing. When mite populations become heavy to severe with heavy webbing, they are more difficult to control. The use of 3 pints OMITE-6E per acre is recommended under these conditions.

OMITE-6E is not systemic in action. Therefore, complete thorough coverage of both upper and lower needle surfaces is necessary for lasting control. The primary activity is against motile forms. The adults and nymphs are usually controlled within a few days after treatment. This is followed by a new hatch of mites which will, in turn be controlled in a few more days. Normally, mites are controlled in 5 days. Under cool conditions, 10 to 20 days may be required for effective control.

Do not spray at temperatures above 90°F.

COMPATIBILITY: OMITE-6E is not compatible with alkaline materials such as lime, lime sulfur or Bordeaux. The effectiveness will be reduced. Do not apply OMITE-6E with oils or emulsifiable concentrate formulations as needle injury may occur.

USE RESTRICTIONS: Do not graze or feed livestock on cover crops grown among the trees.

Do not use this product through any type of irrigation system.

See product Federal label and follow all directions, including any directions for use of buffers.

You may contact the Oregon Department of Fish & Wildlife, National Marine Fisheries Service or US Fish & Wildlife Service for information on listed threatened or endangered species.

Follow all applicable directions, restrictions, and precautions on the EPA registered label.

This label must be in the possession of the user at the time of the pesticide application.
