DIRECTIONS FOR USE

This label and the federal label for this product must be in the possession of the user at the time of pesticide application.

Follow all applicable directions, restrictions, and precautions on this Supplemental label and the main EPA-registered label. It is a violation of federal law to use this product in a manner inconsistent with its labeling.

AGRICULTURAL USE REQUIREMENTS

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR part 170. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE) and restricted-entry interval (REI). The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard.

DO NOT enter or allow worker entry into treated areas during the restricted-entry interval (REI) of 12 hours. Exception: If the product is soil-injected or soil-incorporated, the Worker Protection Standard, under certain circumstances, allows workers to enter the treated area if there will be no contact with anything that has been treated.

PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water is:

- Coverall
- Waterproof gloves
- Chemical-resistant footwear plus socks

For control of downy brome (cheatgrass), mustards, and volunteer grain on land to be summer fallowed and planted to winter wheat. Apply 0.44 lb./A of AAtrex Nine-O plus a registered, postemergence, chemical fallow herbicide to stubble following fall rains, after volunteer grain has begun growth (but not later than February 1). If weeds germinate in the spring, they should be controlled with stubble-mulch tillage.

Restrictions and Precautions

- Treat only once during the fallow period. Do Not make a second application.
- Do not plant spring-seeded small grains, vegetables (including dry beans), sugar beets, small-seeded legumes or grasses the year following application, or injury may occur. Follow application with winter wheat only.
- Avoid spray overlap.
- Use only on silt loam or finer textured soils.
- When using a tank mix, observe all directions, limitations and precautions. Use the most restrictive label.
- Do not apply this product through any type of irrigation system.
- Do not graze treated area within six months after application.
