Axiom® DF Herbicide
For control of weeds in Christmas Trees (Douglas Firs and True Firs)

EPA Reg. No. 264-766
SLN. No. OR-040017

24(c) Supplemental Label

FOR DISTRIBUTION AND USE ONLY WITHIN THE STATE OF OREGON

This label and the federal label for this product must be in the possession of the user at the time of pesticide application. Follow all applicable directions, restrictions, and precautions on this supplemental label and the main EPA-registered label. It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

THIS LABEL IS VALID UNTIL DECEMBER 31, 2012 OR UNTIL OTHERWISE AMENDED, WITHDRAWN, CANCELED, OR SUSPENDED.

Axiom® DF Herbicide

ACTIVE INGREDIENTS:

Flufenacet	
<i>N</i> -(4-Fluorophenyl)- <i>N</i> -(1-methylethyl)-2-[[5-(trifluoromethyl)-1,3,4-thiadiazol-2-yl]-oxy]acetamide.....	54.4%
Metribuzin:	
4-Amino-6-(1,1-dimethylethyl)-3-(methylthio)-1,2,4-triazin-5(4 <i>H</i>)-one.....	13.6%

OTHER INGREDIENTS:	32.0%
	100.0%

STOP - Read the label before use
Keep out of reach of children
CAUTION

For MEDICAL And TRANSPORTATION Emergencies ONLY Call 24 Hours A Day 1-800-334-7577

For PRODUCT USE Information Call 1-866-99BAYER (1-866-992-2937)

ENVIRONMENTAL HAZARDS

Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not apply when weather conditions favor drift from areas treated. Do not contaminate water when disposing of equipment washwaters.

Do not allow sprays to drift onto adjacent desirable plants.

Metribuzin has properties that may result in ground water contamination. Application in areas where soils are permeable or coarse and groundwater is near the surface could result in groundwater contamination.

Ground Water: Flufenacet is known to leach through soil into ground water under certain conditions as a result of label use. Use of this chemical in areas where soils are permeable, particularly where the water table is shallow, may result in ground-water contamination.

Surface Water: Flufenacet and metribuzin residues can contaminate surface water through spray drift. Under some conditions, they also have high potential for runoff into surface water (primarily via dissolution in runoff water or erosion), for several to many months post-application. These include poorly draining or wet soils with readily visible slopes toward adjacent surface waters, frequently flooded areas, areas overlying extremely shallow ground water, areas with in-field canals or ditches that drain to surface water, areas not separated from adjacent surface waters with vegetated filter strips, and areas overlying tile drainage systems that drain to surface waters.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

CHRISTMAS TREES	RATE oz/A	WEEDS
Douglas Fir True Fir (including Noble, Grand, Frazier and Nordman)	12 – 20	Controlled: Annual Bluegrass Annual Ryegrass <i>Bromus</i> sp. Fall panicum Rattail fescue Suppressed: False Dandelion Lambsquarter Pigweeds Mustards
REMARKS: Apply the specified dosage per acre as a pre- or very early post-emergent (1-leaf stage) application to weeds. Use the higher rate for heavier weed populations or where longer control is needed. Treat only dormant trees (prior to bud swell) which have gone through one or more growing seasons. Apply in a minimum of 10 gal of water per acre by ground or air. AXIOM may be applied only one time per growing season. Allow at least 11 months between applications.		

RESTRICTIONS/PRECAUTIONS:

- Do not apply to trees that are under stress (drought, insects, disease).
- For improved control of emerged weeds, and/or control of additional weed species, a tank-mix application with another registered herbicide may be used. Consult tank-mix partner label for use directions and precautions.
- Do not apply this product through any type of irrigation system.

For MEDICAL And TRANSPORTATION Emergencies ONLY Call 24 Hours A Day 1-800-334-7577
