**ADMIRE® PRO *Systemic Protectant***  
**For Post-Harvest or Dormant Treatment Use  
on Cranberry to control Black vine weevil.**  
**EPA Reg. No. 264-827**  
**EPA SLN. No. OR-050025**

## ***24(c) Supplemental Label***

### **FOR DISTRIBUTION AND USE ONLY WITHIN THE STATE OF OREGON**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. This label must be in the possession of the user at the time of pesticide application. Follow all applicable directions, restrictions, Worker Protection Standard requirements, and precautions on the EPA registered label.

**This label for ADMIRE® PRO *Systemic Protectant* expires and must not be distributed or used in accordance with this SLN registration after December 31, 2009.**

### **ADMIRE® PRO *Systemic Protectant***

**ACTIVE INGREDIENT:**

Imidacloprid, 1-[(6-Chloro-3-pyridinyl)methyl]-N-nitro-2-imidazolidinimine ..... 42.8%

**OTHER INGREDIENTS:**..... 57.2%

**Contains 4.6 pounds of active ingredient per gallon or 550 grams AI/liter** 100.0%

**SHAKE WELL BEFORE USING**

## **KEEP OUT OF REACH OF CHILDREN CAUTION**

**For MEDICAL And TRANSPORTATION Emergencies ONLY Call 24 Hours A Day 1-800-334-7577**

**For PRODUCT USE Information Call 1-866-99BAYER (1-866-992-2937)**

### **ENVIRONMENTAL HAZARDS**

Do not apply directly to water, areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment washwaters.

This product is highly toxic to bees exposed to direct treatment or residues on blooming crops or weeds. Do not apply this product or allow it to drift to blooming crops or weeds if bees are visiting the treatment area. This product is toxic to wildlife and highly toxic to aquatic invertebrates.

This chemical demonstrates the properties and characteristics associated with chemicals detected in ground water. The use of this chemical in areas where soils are permeable, particularly where the water table is shallow, may result in groundwater contamination.

### **DIRECTIONS FOR USE**

**It is a violation of Federal law to use this product in a manner inconsistent with its labeling.**

Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.

## AGRICULTURAL USE REQUIREMENTS

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR part 170. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE) and restricted-entry interval. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard. Do not enter or allow worker entry into treated areas during the restricted entry interval (REI) of 12 hours.

**Exception:** If the product is soil-injected or soil-incorporated, the Worker Protection Standard, under certain circumstances, allows workers to enter the treated area if there will be no contact with anything that has been treated.

PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water, is:

- Coveralls
- Chemical-resistant gloves made of any waterproof material such as, barrier laminate, butyl rubber, nitrile rubber, neoprene rubber, natural rubber, polyethylene, polyvinylchloride (PVC) or viton
- Shoes plus socks

## RECOMMENDED APPLICATIONS

### CRANBERRY

Pest Controlled	Rate fluid ounces/Acre
Black vine weevil	7.0

#### Post-Harvest or Dormant Spray

Apply specified rate of ADMIRE PRO to moist soil in one of the following methods:

1. As a broadcast soil spray (ground application only) or spot-spray directed to the infested bed area using a minimum of 20 gallons of water per acre followed **immediately** by 0.1 to 0.3 inches of rain or irrigation water. If making spot applications, use a rate per acre equivalent to a broadcast application.
2. As a chemigation application with 600 to 1000 gallons of water followed by 0.1 to 0.3 inches of irrigation water.

For best control of black vine weevil, application timing should target the larval stages and should be made only when crop is dormant (November 1 to March 1).

#### RESTRICTIONS

- Do not apply during bloom.
- Do not apply within 30 days of harvest.
- Do not make more than one post-harvest application in the same crop year.
- Do not make more than one dormant application in the same crop year.
- The main container label (Section 3) provides directions for post-bloom use to control rootgrubs and rootworms. This supplemental label provides directions for post-harvest and/or dormant use to control black vine weevil. Regardless of application timing, do not apply more than a total of 14 fluid ounces of ADMIRE PRO (0.5 lb. Imidacloprid) per acre per crop year.

**NOTE:** ADMIRE PRO has not been tested for crop response in tank mixes with other registered cranberry fungicides or insecticides. If tank mixing is desired, premix a sample of the ADMIRE PRO and the desired fungicide or insecticide partner at labeled rates and apply to a small area. Evaluate crop response within 48 hours and for at least two weeks prior to utilizing the tank mix on larger acreage. If crop injury results from the premix test, do not apply the tank mix to larger acreage.

**NOTE:** Follow these and all other Use Directions and Precautions on the package label.

For **MEDICAL** And **TRANSPORTATION** Emergencies **ONLY** Call 24 Hours A Day 1-800-334-7577
