

SUPPLEMENTAL LABELING

**FOR DISTRIBUTION AND USE ONLY WITHIN THE STATE OF OREGON
(EAST OF THE CASCADE MOUNTAIN RANGE)**

**EVEREST[®]
70% WATER DISPERSIBLE GRANULAR HERBICIDE**

ACTIVE INGREDIENT	By wt.
Flucarbozone-sodium*	
4,5-Dihydro-3-methoxy-4-methyl-5-oxo-N- [[2-(trifluoromethoxy)phenyl]sulfonyl]-1H- 1,2,4-triazole-1-carboxamide, sodium salt.....	70%
INERT INGREDIENTS.....	30%
Total.....	100%

*66% Flucarbazone acid equivalent

**EPA Reg. No. 66330-49
EPA SLN No. OR-050027**

**This label valid until December 31, 2009 or until otherwise amended, withdrawn,
canceled or suspended.**

**Use on Perennial Kentucky Bluegrass Grown For Seed Only During the Year of
Establishment
FIFRA §24(c) Special Local Need Registration**

KEEP OUT OF REACH OF CHILDREN

CAUTION

**In Case of Medical Emergency Involving This Product,
Call Day or Night: 800-228-5635, Ext. 174**

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling. This labeling and the main label must be in the possession of the user at the time of application.

Read the entire label for EVEREST before proceeding with the use directions contained in this supplemental labeling. Follow all applicable directions, restrictions, Worker Protection Standard requirements, and precautions on the EPA registered label and this supplemental label.

ENVIRONMENTAL HAZARDS

Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not apply when weather conditions favor drift from areas treated. Do not contaminate water when disposing of equipment washwaters.

Do not allow sprays to drift onto adjacent desirable plants.

ENDANGERED SPECIES PROTECTION

To avoid adverse effects on endangered dicot plant species, the following measures will be required where endangered plant species occur in the counties listed in the table below:

State	County
Oregon	Union Wallowa

For ground applications, the applicator must:

1. Apply when there is sustained wind away from native plant communities, OR
2. Use low-pressure nozzles according to manufacturer’s specifications that produce only coarse or very coarse droplets, OR
3. Leave a 50 foot untreated buffer between the treatment and native plant communities

For aerial applications, the applicator must:

1. Apply only when there is sustained wind away from native plant communities, OR
2. Leave a 350 foot untreated buffer between the treatment and native plant communities

DIRECTIONS FOR USE

Apply EVEREST to Kentucky bluegrass grown for seed (only during the year of establishment) for control of wild oats, windgrass, and other grass and broadleaf weeds at a rate of 0.6 ounce/acre, with a non-ionic surfactant at a rate of 0.25% v/v.

LEVEL OF WEED CONTROL	
Grass Weeds	Notes
Wild Oats (<i>Avena fatua</i>)	Control
Windgrass (<i>Apera spica-venti</i>)	Control
Cheat (<i>Bromus secalinus</i>)	Control with fall applications. Suppression with spring applications.
Ventenata (<i>Ventenata dubia</i>)	Suppression
Broadleaf Weeds	Notes
Mustard Complex (Black, Blue, Tansy, Tumble, Wild)	Control

GROUND APPLICATION

Apply in a spray volume of 5 to 10 gallons/acre (or 50 to 100 liters/hectare) at 30 to 50 PSI to ensure proper weed coverage. Flat fan nozzles of 80 or 110 degrees are recommended for optimum coverage. Do not use floodjet or control droplet application equipment. Nozzles may be oriented 45 degrees forward to enhance crop penetration and to give better weed coverage.

AERIAL APPLICATION

Apply in water using a minimum spray volume of 3 gallons/acre (or 30 liters/hectare). For best results, particularly in dry conditions or where heavy weed infestations exist, use a minimum of 5 gallons/acre (or 50 liters/hectare). Use nozzles that provide 200 to 350 micron size droplets for best results and to insure uniform spray coverage. Aerial applications with EVEREST should be made with low drift nozzles at a maximum height of 10 feet above the crop and at a maximum pressure of 40 psi. Do not apply aerially when wind speed is greater than 10 mph. Do not allow spray to drift onto adjacent crops, as injury or loss may occur.

See the *Aerial Drift Reduction Advisory Information* section of this label for additional information on how to reduce drift during aerial application.

RESTRICTIONS

- This product is for use during the establishment year only. Do not harvest any portion of the field for any purpose within 1 year (365 days) of application.
- No portion of the treated field, including hay, forage, seed screening or stubble can be used for animal feed within 1 year (365 days) of application.
- Do not apply more than 0.6 ounces/acre of Everest. Do not make more than one post-emergence application of Everest.
- For use under this SLN registration, do not apply Everest through any type of irrigation system.
- For use only on perennial Kentucky bluegrass. Do not use Everest on annual Kentucky bluegrass.

ARYSTA LIFESCIENCE CORPORATION'S WARRANTY DISCLAIMER FOR USE OF EVEREST ON KENTUCKY BLUEGRASS GROWN FOR SEED

EVEREST when used on Kentucky bluegrass grown for seed may lead to crop injury, loss, or damage. Arysta LifeScience Corporation recommends that the user and/or grower test EVEREST in order to determine its suitability for such intended use. Arysta LifeScience Corporation makes EVEREST available to the user and/or grower solely to the extent the benefit and utility, in the sole opinion of the user and/or grower, outweigh the extent of potential injury associated with the use of this product. The decision to use

or not to use EVEREST must be made by each individual EVEREST user and/or grower on the basis of possible crop injury from EVEREST, the severity of weed infestation, the cost of alternative weed controls, and other factors. Arysta LifeScience Corporation intends that because of the risk of crop damage that all such use is at the user's and/or grower's risk. Arysta LifeScience Corporation makes no warranty, express or implied, with respect to the suitability of EVEREST for use on Kentucky bluegrass grown for seed.
