LSP Flowable Fungicide
For Control of Seedborne Ascochyta Blight in Chickpeas
EPA Reg. No. 264-948
SLN. No. OR-060002

24(c) Supplemental Label

FOR DISTRIBUTION AND USE ONLY IN THE STATE OF OREGON

This label and the federal label for this product must be in the possession of the user at the time of pesticide application. Follow all applicable directions, restrictions, and precautions on this supplemental label and the main EPA-registered label. It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

THIS LABEL IS VALID UNTIL DECEMBER 31, 2013 OR UNTIL OTHERWISE AMENDED, WITHDRAWN, CANCELED, OR SUSPENDED.

LSP Flowable Fungicide

ACTIVE INGREDIENT:

Thiabendazole: 2-(4-thiazolyl) benzimidazole30%

INERT INGREDIENTS:70%

TOTAL 100%

Contains Petroleum Distillates

Note to Physician: Contains petroleum distillate – vomiting may cause aspiration pneumonia.

In case of emergency call toll free the Bayer CropScience Emergency Response Telephone No. 1-800-334-7577.
Have a product container or label with you when calling a poison control center or doctor, or going for treatment.

KEEP OUT OF REACH OF CHILDREN CAUTION

ENVIRONMENTAL HAZARDS

This pesticide is toxic to fish. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water by cleaning of equipment or disposal of waste.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Not for use on agricultural establishments in hopper-box, planter-box, slurry-box, or other seed treatment applications at or immediately before planting.

GENERAL: LSP is a systemic fungicide especially formulated as a liquid suspension seed protectant for use as a spray mist or slurry seed treatment.

SEED TREATMENT: Clean seed treatment equipment thoroughly before using LSP. This product has no vapor action; therefore, it is essential that thorough coverage of the seed be obtained. In this regard, LSP is recommended to be dispersed with water to aid distribution on the seed. When dispersed with water, however, the resulting suspension must be kept under constant agitation.

DIRECTIONS**CHICKPEAS (ALSO KNOWN AS GARBANZO BEANS)**

CROP/SITE	TARGET PEST:	RATE and METHOD OF APPLICATION
Chickpeas (also known as Garbanzo Beans)	To aid in control of seedborne Ascochyta Blight (<i>Ascochyta rabiei</i>)	For ready-mix or slurry seed treaters, mix 3.3 fl.oz. of LSP Flowable Fungicide in an equal amount of water (1:1) to provide adequate coverage and apply to 100 lbs. of seed. Keep dispersion under constant agitation. It is essential that thorough coverage of the seed be obtained. For best results against Ascochyta Blight, plant chickpea seed treated with LSP Flowable Fungicide as late in the spring as possible.

PRECAUTIONS/RESTRICTIONS:

SEED TREATMENT WITH LSP FLOWABLE FUNGICIDE WILL NOT PROVIDE POSTEMERGENT PROTECTION OF PLANTS GROWN IN OR NEAR INFECTED FIELDS.

Treated seed must be planted and cannot be used for food, feed, or oil purposes. Do not mix treated seed with untreated seed.

REQUIREMENT: When using formulations that do not contain dye, to comply with 21 CFR Chapter 1, Section 2.25, all grain seed (including chickpeas) treated with an a poisonous substance must be colored with an approved dye (40 CFR 180.1001) to distinguish and prevent subsequent and inadvertent use as a food for man or feed for animals.

COMPATIBILITY: LSP should not be tank mixed with any pesticide unless adequate physical compatibility and phytotoxicity tests have been completed and proved to be satisfactory.

SEED LABELING: Treated seed must be labeled with the following statement: "This seed is treated with Thiabendazole at the manufacturer's recommended rate. Not for human or animal consumption. Do not use treated seed for food, feed, or oil purposes." Add appropriate information for any other chemical treatments.
