

Supplemental Labeling

SPECIAL LOCAL NEED FOR DISTRIBUTION AND USE ONLY WITHIN OREGON

EPA Reg. No. 241-418

EPA SLN No.: OR-060006

FOR WEED CONTROL IN CLOVER GROWN FOR SEED PRODUCTION

ACTIVE INGREDIENT:

pendimethalin (N-(1-ethylpropyl)-3,4-dimethyl-2,6-dinitrobenzenamine).....38.7%

INERT INGREDIENTS:.....61.3%

TOTAL.....100.0%

This label is valid until December 31, 2010 or until otherwise amended, withdrawn, canceled or suspended.

Follow all applicable directions, restrictions, Worker Protection Standard requirements, and precautions on the EPA-registered main product label for Prowl® H₂O herbicide, EPA Reg. No. 241-418.

This labeling must be in the possession of the user at the time of application.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Observe all cautions and limitations on this label and on the labels of products used in combination with Prowl H₂O. Do not use Prowl H₂O other than in accordance with the instructions set forth on this label. The use of Prowl H₂O not consistent with this label may result in injury to crops. Keep containers closed to avoid spills and contamination.

ENVIRONMENTAL HAZARDS

This product is toxic to fish. **DO NOT** apply directly to water, or to areas where surface water is present, or to intertidal areas below the mean high water mark. Drift and runoff from treated areas may be hazardous to aquatic organisms in adjacent aquatic sites. **DO NOT** contaminate water when disposing of equipment washwaters or rinsate.

GENERAL INFORMATION

Prowl H₂O may be applied for pre-emergence weed control of most annual grasses and certain broadleaf weeds as they germinate, but it will not

control established weeds. Unusually cold, excessively wet, or hot and dry conditions that delay germination or extend it over a long period of time may reduce weed control. Prowl H₂O is most effective when mechanically incorporated, or when incorporated in the weed germination zone by rainfall or irrigation.

Refer to the Prowl H₂O main product label for a complete listing of weeds controlled.

APPLICATION INSTRUCTIONS

Timing:

Apply Prowl H₂O before clover exceeds 6 inches in height. Applications when clover exceeds 6 inches in height may result in poor weed control in the crop row due to possible reduced spray coverage to the soil.

Some stunting and chlorosis of the clover may occur with postemergence applications.

Rate:

Uniformly apply Prowl H₂O in 10 or more gallons of water per acre with ground equipment to established clover grown for seed. Depending on weed species, apply Prowl H₂O at broadcast rates of 1.0 to 4.0 quarts per acre prior to weed emergence.

WEEDS CONTROLLED

Prowl® H₂O herbicide applied at a rate of 1.0 to 2.0 quarts per acre prior to weed emergence will control the following weeds:

| Grasses | Broadleaf Weeds |
|-------------------------|-----------------|
| Barnyardgrass | Carpetweed |
| Crabgrass | Florida Pusley |
| Crowfootgrass | Kochia |
| Foxtail, Giant | Lambsquarters |
| Foxtail, Green | Pigweed |
| Foxtail, Yellow | Purslane |
| Goosegrass | Spurge, annual |
| Johnsongrass (seedling) | |
| Panicum, Fall | |
| Panicum, Texas | |
| Sandbur, Field | |
| Signalgrass | |
| Witchgrass | |

Prowl H₂O applied at a rate of 2.1 to 4.0 quarts per acre prior to weed emergence will control the following weeds in addition to those listed above:

| Grasses | Broadleaf Weeds |
|----------------------|-------------------------|
| Bluegrass (annual) | Chickweed (common) |
| Cupgrass, Woolly | Dodder* |
| Itchgrass | Fiddleneck |
| Junglerice | Henbit |
| Lovegrass | Knotweed |
| Millet, Wild-proso | Puncturevine |
| Panicum, Browntop | Rocket, London |
| Shattercane | Shepherdspurse |
| Sprangletop, Mexican | Smartweed, Pennsylvania |
| Sprangletop, Red | Velvetleaf (Buttonweed) |

* For optimum Dodder control, use 3.0 to 4.0 quarts per acre of **Prowl H₂O**.

RESTRICTIONS AND LIMITATIONS

DO NOT exceed 4.0 quarts of product per acre in any one crop season.

DO NOT apply this product through any type of irrigation system, or by air.

DO NOT apply to seedling clover.

DO NOT use on peat or muck soils.

NOTE: If loss of clover stand occurs due to adverse weather conditions, any crop registered for **Prowl H₂O** preplant incorporated use can be replanted the same year into **Prowl H₂O** treated soil (<1.5 quarts/acre) without adverse effects. If replanting is necessary, soil should not be reworked deeper than the **Prowl H₂O** treated zone.

Refer to the **Prowl H₂O** main product label for additional rotational crop instructions and restrictions.

Special Crop Use Restrictions

The pesticide applicator, the producer of the crop, and the seed conditioner must be aware that use of this product according to this labeling is deemed a nonfeed/nonfood use by the Oregon Department of Agriculture, and is regulated by Oregon Administrative Rule (OAR) 603-057-0535, Pesticide Use On Crops Grown For Seed. If the applicator of this pesticide is not the producer, the applicator should provide a copy of this labeling to the producer of the crop. Producers of this crop who use this product, or cause the product to be used on a field they operate, should provide a copy of this pesticide label to the seed conditioner.

This pesticide does not have an established pesticide residue tolerance for this crop. Consequently, no portion of this seed crop may be used or distributed for food or feed. This restriction pertains to, but is not limited to, green chop, hay, pellets, meal, whole seed, cracked seed straw, roots, bulbs, foliage or seed screenings, and to the grazing of the crop field, stubble or regrowth. All seed screenings shall be disposed of in such a manner that the screenings cannot be distributed or used for food or feed purposes, as indicated in OAR 603-057-0535. Additional regulations concerning seed screenings are stated in OAR 603-057-0535.

Any seed from a field treated with this pesticide product shall bear specific and conspicuous container labeling, or if shipped in bulk, on the shipment invoice or bill of lading. The labeling shall contain the following statement.

"This seed was produced using one of more products for which the United States Environmental Protection Agency has not established pesticide residue tolerances. This seed, in whole, as sprouts, or in any form may not be used for human consumption or animal feed. Failure to comply with this condition may violate requirements of the Federal Food and Drug Administration, Oregon Department of Agriculture and other regulatory agencies."
