# Supplemental Labeling

## FOR DISTRIBUTION AND USE ONLY IN OREGON

EPA Reg. No. 7969-197

EPA SLN No. OR-070001

### FOR DISEASE CONTROL IN CRIMSON CLOVER GROWN FOR SEED PRODUCTION

**THIS LABEL IS VALID UNTIL DECEMBER 31, 2012 OR UNTIL OTHERWISE AMENDED, WITHDRAWN, CANCELLED, OR SUSPENDED.**

#### Active Ingredient:

boscalid (3-pyridinecarboxamide,2-chloro-N-(4'-chloro(1,1'-biphenyl)-2-yl) ..... 70.0%

**Other Ingredients:** ..... 30.0%

**Total:** ..... 100.0%

Follow all applicable directions, restrictions, Worker Protection Standard requirements, and precautions on the EPA-registered product label for **Endura® fungicide**, EPA Reg. No. 7969-197.

#### Environmental Hazards

**DO NOT** apply directly to water, areas where surface water is present, or intertidal areas below the mean high water mark. **DO NOT** contaminate water when disposing of equipment wash waters.

#### Surface Water Advisory

This product may contaminate water through drift of spray in wind. This product has a potential for runoff for several months or more after application. Poorly draining soils and soils with shallow watertables are more prone to produce runoff that contains this product. A level, well maintained vegetative buffer strip between areas to which this product is applied and surface water features such as ponds, streams, and springs will reduce the potential for contamination of water from rainfall-runoff. Runoff of this product will be reduced by avoiding applications when rainfall is forecast to occur within 48 hours.

#### Directions For Use

It is a violation of federal law to use this product in a manner inconsistent with its labeling. **DO NOT** apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your

state or tribe, consult the agency responsible for pesticide regulation. Refer to the **Endura** main label for **Precautionary Statements, First Aid, Personal Protective Equipment, Environmental Hazards** and **Storage and Disposal** requirements. This supplemental label must be in the user's possession during application.

#### General Information

**Endura® fungicide** provides optimum disease control when applied in a regularly scheduled protective fungicide program and used in a spray program that rotates fungicides with different modes of action. Refer to the **Endura** main label for general resistance management information and to the crop-specific use recommendations and restrictions found in this label.

#### Application Information

Apply **Endura** according to the rate, timing, resistance management and adjuvant use recommendations in the **Endura Crop-Specific Use Directions** table in this label.

Observe the additional general recommendations on application instructions, additive use and mixing order on the **Endura** main label.

**Endura** may be applied by ground sprayer, aerial equipment or through sprinkler irrigation systems. To ensure efficacy, ensure adequate water volume for thorough canopy penetration.

## Endura Crop-Specific Use Directions

| Crop  | Target Diseases  | Product Use Rate per Application | Maximum Number of Applications per Season | Maximum Product Rate per Season | Minimum Time from Application to Harvest (PHI) |
|---|--|----------------------------------|---|---------------------------------|--|
| <b>Crimson Clover</b><br>(grown for seed only)  | Sclerotinia crown rot and wilt<br>( <i>Sclerotinia trifoliorum</i> ) | 5 to 8 oz per acre               | 1   | 8 oz per acre                   | 0 days   |
| <p><b>Application Directions:</b> Begin application of <b>Endura</b> when conditions are favorable for disease but prior to the onset of disease development. Disease control can be improved when application equipment and spray volumes are adjusted to achieve thorough canopy penetration and coverage. If another fungicide application is needed, use a product with a different mode of action from <b>Endura</b>. Under some conditions the use of additives or adjuvants may improve the performance of <b>Endura</b>.</p> <p><b>Resistance Management:</b> To limit the potential for development of resistance, <b>DO NOT</b> make more than one (1) application of <b>Endura</b> per season.</p> |  |                                  |   |                                 |  |

## Special Crop Use Restrictions

The pesticide applicator, the producer of the crop, and the seed conditioner must be aware that use of this product according to this labeling is deemed a nonfeed/nonfood use by the Oregon Department of Agriculture, and is regulated by Oregon Administrative Rule (OAR) 603-057-0535, Pesticide Use On Crops Grown For Seed. If the applicator of this pesticide is not the producer, the applicator should provide a copy of this labeling to the producer of the crop. Producers of this crop who use this product, or cause the product to be used on a field they operate, should provide a copy of this pesticide label to the seed conditioner.

This pesticide does not have an established pesticide residue tolerance for this crop. Consequently, no portion of this seed crop may be used or distributed for food or feed. This restriction pertains to, but is not limited to, green chop, hay, pellets, meal, whole seed, cracked seed straw, roots, bulbs, foliage or seed screenings, and to the grazing of the crop field, stubble or regrowth. All seed

screenings shall be disposed of in such a manner that the screenings cannot be distributed or used for food or feed purposes, as indicated in OAR 603-057-0535. Additional regulations concerning seed screenings are stated in OAR 603-057-0535.

Any seed from a field treated with this pesticide product shall bear specific and conspicuous container labeling, or if shipped in bulk, on the shipment invoice or bill of lading. The labeling shall contain the following statement:

“This seed was produced using one of more products for which the United States Environmental Protection Agency has not established pesticide residue tolerances. This seed, in whole, as sprouts, or in any form may not be used for human consumption or animal feed. Failure to comply with this condition may violate requirements of the Federal Food and Drug Administration, Oregon Department of Agriculture and other regulatory agencies.”

## Conditions of Sale and Warranty

The **Directions For Use** of this product reflect the opinion of experts based on field use and tests. The directions are believed to be reliable and must be followed carefully. However, it is impossible to eliminate all risks inherently associated with use of this product. Crop injury, ineffectiveness or other unintended consequences may result because of such factors as weather conditions, presence of other materials, or use of the product in a manner inconsistent with its labeling, all of which are beyond the control of BASF CORPORATION ("BASF") or the Seller. To the extent consistent with applicable law, all such risks shall be assumed by the Buyer.

BASF warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes referred to in the **Directions For Use**, subject to the inherent risks, referred to above.

TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, BASF MAKES NO OTHER EXPRESS OR IMPLIED WARRANTY OF FITNESS OR MERCHANTABILITY OR ANY OTHER EXPRESS OR IMPLIED WARRANTY. TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, BASF AND THE SELLER DISCLAIM ANY LIABILITY FOR CONSEQUENTIAL, SPECIAL OR INDIRECT DAMAGES RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT. BASF and the Seller offer this product, and the Buyer and User accept it, subject to the foregoing **Conditions of Sale and Warranty** which may be varied only by agreement in writing signed by a duly authorized representative of BASF.
