

Special Local Need

FOR DISTRIBUTION AND USE ONLY WITHIN THE STATE OF OREGON

ASULOX® HERBICIDE

EPA Reg. No. 70506-139

EPA SLN No. OR- 070016
(revised)

POSTEMERGENCE WEED CONTROL IN SPINACH GROWN FOR SEED

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. This label is valid until Dec. 31, 2013 or until otherwise amended, withdrawn, cancelled, or suspended.

This label and the federal label for this product must be in the possession of the user at the time of pesticide application.

Follow all applicable directions, restrictions and precautions on this label and the main EPA-registered label.

ACTIVE INGREDIENT:

Sodium salt of asulam (methyl sulfanylcarbamate)* 36.2%

OTHER INGREDIENTS: 63.8%

TOTAL:100.0%

*Equivalent to 33.1% asulam or not less than 3.34 lbs. per gallon

KEEP OUT OF REACH OF CHILDREN CAUTION

ENVIRONMENTAL HAZARDS

This chemical is known to leach through soil into ground water under certain conditions as a result of agricultural use. Use of this chemical in areas where soils are permeable, particularly where the water table is shallow, may result in ground water contamination. Surface water contamination may occur in areas with poorly draining soils and little or no buffers or in areas where drainage systems flow directly to surface water.

Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not clean equipment or dispose of equipment washwater in a manner that will contaminate resources. Do not apply when weather conditions favor drift from treated areas. Do not contaminate water by cleaning of equipment or disposal of wastes.

Do not apply Asulox Herbicide through any type of irrigation systems.

WEEDS	RATE/A	INSTRUCTIONS
Dog fennel Lambsquarters (suppression) Pigweed Poppies (suppression) Prickley lettuce Shepherdspurse	1.5 – 3.0 pts	One application per season: use the 1.5 pt/A on spinach with 2-4 leaves, or 3 pt/A on spinach with 4-6 true leaves. Two applications per season: use 3 pt/A on spinach with 4-8 true leaves and 3 pt/A 7 days later (typically 8-12 true leaves). Some stunting of the spinach may occur, especially with two applications at 3 pt/A. A non-ionic surfactant at 0.25% v/v may be added to the spray to increase efficacy. Crop oils and other adjuvants such as urea ammonium nitrate are not recommended. Suggested dilution rate is 20 gallons water per acre.

SPECIAL CROP USE RESTRICTIONS

The pesticide applicator, the producer of the crop, and the seed conditioner must be aware that use of this product according to this labeling is deemed a nonfeed/nonfood use by the Oregon Dept. of Agriculture, and is regulated by Oregon Administrative Rule (OAR) 603-057-0535, Pesticide Use on Crops Grown For Seed. If the applicator of this pesticide is not the producer, the applicator should provide a copy of this labeling to the producer of the crop. Producers of this crop who use this product, or cause the product to be used on a field they operate, should provide a copy of this pesticide label to the seed conditioner.

This pesticide does not have an established pesticide residue tolerance for this crop. Consequently, no portion of this seed crop may be used or distributed for food or feed for 1 year (365 days) after the last application of this product. This restriction pertains to, but is not limited to, green chop, forage, hay, pellets, meal, whole seed, cracked seed, straw, roots, bulbs, foliage or seed screenings, and to the grazing of the crop field, stubble or regrowth. All seed screenings shall be disposed of in such a manner that the screenings cannot be distributed or used for food or feed purposes, as indicated in OAR 603-057-0535. Additional regulations concerning seed screenings are stated in OAR 603-057-0535.

Any seed from a field treated with this pesticide product shall bear specific and conspicuous container labeling, or if shipped in bulk, on the shipment invoice or bill of lading. The labeling shall contain the following statement:

This seed was produced using one or more products for which the United States Environmental Protection Agency has not established pesticide residue tolerances. This seed, in whole, as sprouts, or in any form, may not be used for human consumption or animal feed. Failure to comply with this condition may violate requirements of the Federal Food and Drug Administration, the Oregon Dept. of Agriculture and other regulatory agencies.
