Nemacur[®] 3 Emulsifiable Systemic
Insecticide-Nematicide

EPA Reg. No. 264-731

For Use on Iris and Lily Bulbs

SLN. No. OR-090004

24(c) Supplemental Label

FOR DISTRIBUTION AND USE ONLY WITHIN THE STATE OF OREGON

This label and the federal label for this product must be in the possession of the user at the time of pesticide application. Follow all applicable directions, restrictions, and precautions on this supplemental label and the main EPA-registered label. It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

THIS LABEL IS VALID UNTIL DECEMBER 31, 2009 OR UNTIL OTHERWISE AMENDED, WITHDRAWN, CANCELED, OR SUSPENDED.

Nemacur[®] 3 Emulsifiable Systemic Insecticide-Nematicide

ACTIVE INGREDIENT:

Ethyl 3-methyl-4-(methylthio)phenyl(1-methylethyl)phosphoramidate 35%

INERT INGREDIENTS: 65%

Contains Aromatic Petroleum Distillates. 100%

Contains 3 pounds of ethyl 3-methyl-4-(methylthio)phenyl(1-methylethyl)phosphoramidate per gallon.

STOP - Read the label before use
KEEP OUT OF REACH OF CHILDREN
DANGER POISON
PELIGRO

ENVIRONMENTAL HAZARDS

This pesticide is toxic to fish and wildlife. Drift and runoff from treated areas may be hazardous to aquatic organisms in neighboring areas. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment washwaters.

Do not use mist sprayers. Use only coarse sprays directed at soil to eliminate spray drift. Aerial application of this product is prohibited.

Ground Water Advisory: Fenamiphos is known to leach through soil and has been found in ground water as a result of agriculture use. Users are advised not to apply in areas where soils are permeable, particularly where ground water is used for drinking water. Consult with the pesticide state lead agency for information regarding soil permeability and aquifer vulnerability in your area.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulations.

AGRICULTURE USE REQUIREMENTS

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR part 170. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE) and restricted-entry interval. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard.

Do not enter or allow worker entry into treated areas during the restricted entry interval (REI) of 48 hours.

Exception: If the product is soil-incorporated, the Worker Protection Standard, under certain circumstances, allows workers to enter the treated areas within the 48-hour restriction if there will be no contact with anything that has been treated.

PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water, is:

- coveralls worn over long-sleeve shirt and long pants,
- chemical-resistant gloves made of any waterproof material,
- chemical-resistant footwear plus socks, and
- chemical-resistant headgear (if overhead exposure)

Notify workers of the application by warning them orally and by posting warning signs at entrances to treated area.

APPLICATION DIRECTIONS

CROP	PEST	DOSAGE NEMACUR 3	REMARKS
Iris and Lilly Bulbs	Bulbous Nematodes	2 to 4 gallons per acre (based on 42-inch rows – 12,445 linear feet of row)	Apply specified dosage in the furrow at time of planting, so that the material is incorporated into the covering soil, or in a 10- to 12-inch band over the row after planting. Apply in furrow in the fall at time of planting or in a band over the row in October, November or December. NOTE: On year old plantings, apply over the row as a fall application in October, November or December. Incorporate with irrigation or rainfall as soon as possible after application. Tolerance of bulbs to NEMACUR may vary with varieties. Test a small number of plants if tolerance is not locally known. Do not apply to green foliage.

RESTRICTIONS:

When used on erodible soils, best management practices for minimizing runoff should be employed. Consult your local Soil Conservation Service for recommendations in your use area.

Do not apply within 100 feet of the following aquatic areas: lakes, reservoirs, rivers, permanent streams, marshes, natural ponds and estuaries.

Do not cultivate within 10 feet of an aquatic area to allow growth of a vegetative filter strip.

Do not apply this product with knapsack or similar equipment that is placed on the user's body.

After May 31, 2005, do not apply to hydrologic soil group A soils that are excessively drained and predominately sand or loamy sand such as soils in the suborder psamments with shallow water table (less than 50 feet deep). These classifications and soil taxonomy refer to USDA definitions. If you are unsure of the type of soil you are treating, please consult with your county's extension agent or the product manufacturer.
