## Treflan<sup>®</sup> TR-10<sup>®</sup>

EPA Reg. No. 62719-131

EPA 24(c) Special Local Need Registration SLN OR-900019

(For Distribution and Use Only Under Control of Members of the Oregon Alfalfa Seed Growers Association, Gardena Alfalfa Seed Growers Association, Inc., and Josephine Growers' Cooperative Association in the Counties of Jackson, Josephine, Malheur, Morrow, and Umatilla in the State of Oregon)

**Expiration Date:** This label valid until December 31, 2012 or until otherwise amended, withdrawn, canceled, or suspended.

### Dodder Control in Established Alfalfa Grown for Seed

#### ATTENTION

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This label and the federal label must be in the possession of the user at the time of pesticide application.
- Read the label affixed to the container for Treflan<sup>®</sup> TR-10<sup>®</sup> granular herbicide before applying. Follow all other applicable directions, restrictions, and precautions on the EPA-registered label.
- Use of Treflan TR-10 according to this supplemental labeling is subject to all precautions and limitations imposed by the label affixed to the container for Treflan TR-10.

#### Active Ingredient:

trifluralin: $\alpha, \alpha, \alpha$ -trifluoro-2,6-dinitro- <i>N</i> , <i>N</i> -dipropyl- <i>p</i> -toluidine.....	10%
Other Ingredients .....	90%
Total .....	100%

### Keep Out of Reach of Children

## CAUTION      PRECAUCION

Si usted no entiende la etiqueta, busque a alguien para que se la explique a usted en detalle. (If you do not understand the label, find someone to explain it to you in detail.)

### Environmental Hazards

This pesticide is extremely toxic to freshwater marine, and estuarine fish and aquatic invertebrates including shrimp and oyster. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not apply in a manner that will directly expose canals, lakes, streams, ponds, marshes or estuaries to aerial drift. Do not contaminate water when disposing of equipment washwaters.

Certain uses of trifluralin may be restricted by a U.S. District Court final order. You may refer to the Oregon Department of Agriculture web site at <http://egov.oregon.gov/ODA/PEST/buffers.shtml> or to the U.S. EPA web site at <http://www.epa.gov/espp/wtc/maps.htm#wtc6> or <http://www.epa.gov/espp/wtc/uselimitation.htm> for information regarding pesticides that may be impacted by the final order.

---

### Directions for Use

---

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.  
Read all Directions for Use carefully before applying.

Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your state or tribe, consult the agency responsible for pesticide regulation.

**Application Directions:** Apply at a broadcast rate of 30 to 40 lb per acre in late winter or spring. Application and activation must occur before dodder germination. For best results Treflan TR-10 should be activated within 3 days

after application. When surface applied, Treflan TR-10 may be activated by rainfall, overhead sprinkler irrigation, flood irrigation or furrow irrigation. If activated using furrow irrigation, the surface of beds between furrows should be thoroughly wetted.

**Specific Use Restrictions:**

- Where alfalfa is to be rotated to another crop in the season following application of Treflan TR-10, plant only those crops to which Treflan TR-10 may be applied as a preplant incorporated treatment or crop injury may occur. Read and carefully follow all rotational crop restrictions on the label for Treflan TR-10. The potential for rotational crop injury may be reduced by moldboard plowing to a depth of 12 inches prior to planting.
- Do not apply to seedling alfalfa (before the 6 true leaf stage).

**Special Crop Use Restrictions:**

The pesticide applicator, the producer of the crop, and the seed conditioner must be aware that use of this product according to this labeling is deemed a nonfeed/non-food use by the Oregon Department of Agriculture, and is regulated by Oregon Administrative Rule (OAR) 603-057-0535, Pesticide Use On Crops Grown For Seed. If the applicator of this pesticide is not the producer, the applicator should provide a copy of this labeling to the producer of the crop. Producers of this crop who use this product, or cause the product to be used on a field they operate, should provide a copy of this pesticide label to the seed conditioner.

This pesticide does not have an established pesticide residue tolerance for this crop. Consequently, no portion of this seed crop may be used or distributed for food or feed for one year (365 days) after the last application of this product. This restriction pertains to, but is not limited to, green chop, forage, hay, pellets, meal, whole seed, cracked seed, straw, roots, bulbs, foliage or seed screenings, and to the grazing of the crop field, stubble or regrowth. All seed screenings shall be disposed of in such a manner that the screenings cannot be distributed or used for food or feed purposes, as indicated in OAR 603-057-0535. Additional regulations concerning seed screenings are stated in OAR 603-057-0535.

Any seed from a field treated with this pesticide product shall bear specific and conspicuous container labeling, or if shipped in bulk, on the shipment invoice or bill of lading. The labeling shall contain the following statement:

"This seed was produced using one or more products for which the United States Environmental Protection Agency has not established pesticide residue tolerances. This seed, in whole, as sprouts, or in any form, may not be used for human consumption or animal feed. Failure to comply with this condition may violate requirements of the Federal Food and Drug Administration, the Oregon Department of Agriculture and other regulatory agencies."
