FOR DISTRIBUTION AND USE ONLY IN THE STATE OF OREGON
THIS LABELING MUST BE IN THE POSSESSION OF THE USER AT THE TIME OF PESTICIDE APPLICATION
This label valid until December 31, 2013 or until otherwise amended, withdrawn, canceled or suspended

Imidan[®] **70-W**
Agricultural Insecticide
EPA Reg. No. 10163-169

SUPPLEMENTAL LABELING FOR CONTROL OF SYNETA BEETLE

ACTIVE INGREDIENT: Phosmet	% By Wt.
N-(Mercaptomethyl) phthalimide, S-(O,O-dimethyl phosphorodithioate).....	70.0%
INERT INGREDIENTS	30.0%
	TOTAL 100.0%

KEEP OUT OF REACH OF CHILDREN
WARNING-AVISO

Si usted no entiende la etiqueta, busque a alguien para que se la explique a usted en detalle. (If you do not understand the label, find someone to explain it to you in detail.)

ENVIRONMENTAL HAZARDS

This chemical can contaminate surface water through aerial and ground spray applications. Under some conditions, it may also have a high potential for runoff into surface water after application. These include poorly draining or wet soils with readily visible slopes toward adjacent surface waters, frequently flooded areas, areas overlaying extremely shallow ground water, areas with in-field canals or ditches that drain to surface water, areas not separated from adjacent surface waters with vegetated filter strips, and areas overlaying tile drainage systems that drain to surface water. Limit spray drift.

This pesticide is toxic to fish and aquatic invertebrates. Do not apply directly to water or to areas where surface water is present or to intertidal areas below the mean high-water mark. Drift and runoff may be hazardous to aquatic organisms in neighboring areas. Do not contaminate water when disposing of equipment washwater or rinsate.

This product is highly toxic to bees exposed directly to treatment of residues on crops. Do not apply this product or allow it to drift to blooming crops or weeds if bees are visiting the treatment area. Protective information may be obtained from your cooperative Agricultural Extension Service.

USE PRECAUTIONS

Read all precautions and directions before using. Apply this product only as specified on this label. Imidan 70-W is compatible with most commonly used insecticides and fungicides, but is incompatible with alkaline materials such as spray lime, lime sulfur, and Bordeaux mixtures. These materials will reduce the insecticidal activity of Imidan 70-W. **Insecticidal activity may also be reduced when the spray solution has a pH of 6 or higher. The pH of the spray solution must be corrected by the addition of a suitable buffering or acidifying agent for optimum insecticidal activity.**

DIRECTIONS FOR USE

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- Follow all applicable directions, restrictions, and precautions on this supplemental label and the main EPA-registered label. It is a violation of federal law to use this product in a manner inconsistent with its labeling.
- This labeling must be in the possession of the user at the time of pesticide application.

Crop	Pest	Rate per Acre	Comments
Sweet Cherries (7)	Syneta Beetle	1 1/3 lbs.	Apply specified rate in a minimum of 50 gals. of water per acre. Use prebloom (popcorn stage) if beetles are present, and allow 5 days before introducing bees. If not sprayed prebloom and syneta beetle is a problem, apply at petal fall prior to shuck fall.
<ul style="list-style-type: none"> • Do not enter or allow entry into treated areas during the restricted entry interval (REI) of 3 days. • Do not apply more than 7 ½ lbs. Imidan 70-W per acre per year. • Limit spray drift; turn airblast spray nozzles inward on row ends; and do not apply when bees are in the area. • Do not apply when bees are actively visiting the crop, cover crop, or weeds blooming in the treatment area. 			

NOTE: This product is sold subject to the CONDITIONS OF SALE set forth on the container label.
