**Sencor® DF 75% Dry Flowable Herbicide**  
**For Weed Control in Established<sup>1</sup> Perennial**  
**Grasses Grown for Seed**

EPA Reg. No. 264-738  
EPA SLN. No. WA-050007

## 24(c) Supplemental Label

### STATE RESTRICTED USE PESTICIDE

**Sencor® DF 75% Dry Flowable Herbicide (metribuzin) is a state restricted use pesticide for the protection of groundwater and is to be distributed only by licensed pesticide dealers. Only certified applicators or persons under the direct supervision of a certified applicator may use or apply Sencor® DF 75% Dry Flowable Herbicide (metribuzin)**

### FOR DISTRIBUTION AND USE ONLY WITHIN THE STATE OF WASHINGTON

This label for Sencor® DF 75% Dry Flowable Herbicide expires and must not be distributed or used in accordance with this SLN registration after December 31, 2010.

#### DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. This label must be in the possession of the user at the time of pesticide application. Follow all applicable directions, restrictions, Worker Protection Standard requirements, and precautions on the EPA registered label.

Used as directed below, Sencor® DF will reduce competition from volunteer seedlings of the indicated crop, annual Bromus species, annual ryegrass, windgrass and annual bluegrass. Sencor® DF will control rattail fescue, henbit, ivyleaf speedwell, chickweed, mustards, and shepherdspurse. Control of the volunteer crop and grassy weeds may be enhanced by adding wetting agents containing crop oil. Follow the directions for use and rates recommended on the wetting agent label.

CROP	RATE LB. SENCOR® DF/A	REMARKS
Tall Fescue Perennial Ryegrass	1/3 to 1/2	Apply specified dosage as a broadcast spray in at least 15 gallons of spray solution per acre when the volunteer grasses are in the 1 to 2 leaf stage following fall rainfall or irrigation but prior to active spring growth. Applications made after mid-February may result in excessive crop injury and/or failure to control weeds. Allow at least 120 days between application and harvest <sup>2</sup> .
Bluegrass <sup>3</sup> Fine Fescue	1/5 to 2/5	

**RESTRICTIONS:** <sup>3</sup> Do not apply to bluegrass grasses grown for seed on sand or loamy sand soils. Use only on soils with organic matter greater than 1.5% and soil pH lower than 7.5. Do not apply more than once per year. For use under this SLN do not apply this product to established<sup>1</sup> perennial grasses grown for seed through any type of irrigation system.

<sup>1</sup> Established grasses are those which have been harvested at least once for seed or were planted one year or more prior to application.

<sup>2</sup> The crop and crop residues may be fed to livestock or used as bedding. If the seed crop is terminated and grazed or cut for forage, allow at least 28 days between application and use as animal feed.

**MIXING:** Sencor® is compatible with most fertilizers, fungicides and insecticides. Sencor® may be combined with other herbicides for enhanced weed control. Before mixing with another herbicide, consult both product labels and a knowledgeable authority or Bayer CropScience representative. On Bluegrass, use 1/5 to 1/4 lb of Sencor® DF/A if tank mixing with another herbicide.

**CONTAINER DISPOSAL GUIDANCE:** Completely empty the contents of the paper container into application equipment, and apply to a labeled crop or site. The empty container may be disposed of in a sanitary landfill. Burning is not a legal method of container disposal in Washington.
